## **Seminar content**

Advancing digitalisation is changing everyday police work: modern communication systems, mobile applications, situation platforms and sensor technology are opening up new possibilities for efficient operational management and real-time coordination. This German-Italian seminar provides practical insights into how digital technologies can be used in a targeted manner in patrol duty and at large events – from situation assessment and operational control to communication between forces in the field.

Participants will gain insights into current technical developments, proven operational concepts and prospects for digital policing. The focus is on a practical exchange of experiences regarding the opportunities, limitations and security aspects of digital systems in operational use.

### **Seminar leader:**

**Rüdiger Thust - former Chief Superintendent, Rosenheim (GERM)**

**Antonio Molinaro – former Dirigente Superiore of Italian National Police – Rome (IT)**

**COST OF THE SEMINAR: 499,00 € for NON – IPA Member  
369,00 € for IPA members.**
